QUICK GUIDE TO USING BEVESPI AEROSPHERE

Before you use your inhaler, please read the Medication Guide and Instructions for Use that come with your prescription.

TWO PUFFS, TWICE A DAY, EVERY DAY

PRIMING YOUR BEVESPI AEROSPHERE INHALER
Before you use BEVESPI AEROSPHERE for the first time, remove the cap from the mouthpiece and shake the inhaler well. Then, press down firmly on the center of the dose indicator until the canister stops moving, to release a puff of medicine. Repeat these steps 3 more times and remember to shake the inhaler well before each puff. Now, your inhaler is ready to use. (If you do not use your inhaler for more than 7 days, you will need to re-prime it with 2 puffs prior to use.)

READING THE DOSE INDICATOR
The dose indicator display window will show you how many puffs of medicine are left in the canister. Before you use the inhaler for the first time, the pointer on the dose indicator should be pointing to the right of “120”. It will continue to move after every 10 puffs.

USING YOUR BEVESPI AEROSPHERE INHALER

STEP 1 Remove the cap and shake the inhaler well before use. Hold the inhaler with the mouthpiece pointing towards you and breathe out fully through your mouth.

STEP 2 Close your lips around the mouthpiece and tilt your head back, keeping your tongue below the mouthpiece. While breathing in deeply and slowly, press down on the center of the dose indicator until the canister stops moving in the actuator and a puff of medicine has been released.

REMEMBER
BEVESPI AEROSPHERE is for long-term use to treat COPD. It is not for use to treat sudden symptoms and won’t replace a fast-acting inhaler. It is not for the treatment of asthma.

CLEANING
It’s important that you clean your inhaler once a week to prevent the build-up of medicine in the mouthpiece. For cleaning instructions, please refer to the Instructions for Use.

IMPORTANT SAFETY INFORMATION ABOUT BEVESPI AEROSPHERE, INCLUDING BOXED WARNING

People with asthma who take long-acting beta,-adrenergic agonist (LABA) medicines, such as formoterol fumarate (one of the medicines in BEVESPI AEROSPHERE), have an increased risk of death from asthma problems. It is not known if LABA medicines increase the risk of death in people with COPD. BEVESPI AEROSPHERE is only approved for use in COPD. BEVESPI AEROSPHERE is not approved for use in asthma.

• Call your healthcare provider if breathing problems worsen over time while using BEVESPI AEROSPHERE
• Get emergency medical care if your breathing problems worsen quickly or if you use your rescue inhaler, but it does not relieve your breathing problems
• Do not use BEVESPI AEROSPHERE to treat sudden symptoms of COPD. Always have a rescue inhaler with you to treat sudden symptoms
• BEVESPI AEROSPHERE is not for the treatment of asthma. It is not known if BEVESPI AEROSPHERE is safe and effective in people with asthma
• Do not use BEVESPI AEROSPHERE if you are allergic to glycopyrrolate, formoterol fumarate, or to any of the ingredients in BEVESPI AEROSPHERE
• Do not use BEVESPI AEROSPHERE more often than prescribed
• Do not take BEVESPI AEROSPHERE with other medicines that contain a LABA or an anticholinergic for any reason. Tell your healthcare provider about all the medicines you take
• Tell your healthcare provider about all your medical conditions including heart problems, high blood pressure, seizures, thyroid problems, diabetes, liver problems, glaucoma, prostate or bladder problems, or problems passing urine

BEVESPI AEROSPHERE can cause serious side effects, including:
• Sudden breathing problems immediately after inhaling your medicine
• Serious allergic reactions. Call your healthcare provider or get emergency medical care if you get any of the following symptoms of a serious allergic reaction: rash; hives; swelling of the face, mouth and tongue; breathing problems
• Fast or irregular heartbeat, increased blood pressure, chest pain
• Tremor or nervousness
• New or worsened eye problems, including acute narrow-angle glaucoma. Symptoms may include: eye pain or discomfort, nausea or vomiting, blurred vision, seeing halos or bright colors around lights, and red eyes. If you have these symptoms, call your healthcare provider right away before taking another dose
• New or worsened urinary retention. Symptoms may include difficulty urinating, painful urination, urinating frequently, or urinating in a weak stream or drips. If you have any of these symptoms, stop taking BEVESPI AEROSPHERE and call your healthcare provider right away
• High blood sugar or low blood potassium

Common side effects of BEVESPI AEROSPHERE include urinary tract infection and cough. Tell your healthcare provider about any side effect that bothers you or that does not go away.

APPROVED USE

BEVESPI AEROSPHERE is a prescription medicine used to treat chronic obstructive pulmonary disease (COPD). COPD includes chronic bronchitis, emphysema, or both. BEVESPI AEROSPHERE is used long term as 2 inhalations, 2 times each day in the morning and in the evening, to improve symptoms of COPD for better breathing. Do not use BEVESPI AEROSPHERE to treat sudden symptoms of COPD; it won’t replace a rescue inhaler. BEVESPI AEROSPHERE is not for the treatment of asthma.

You are encouraged to report negative side effects of prescription drugs to the FDA. Visit www.FDA.gov/medwatch or call 1-800-FDA-1088.
